SOLTXCOUNT

Scope: These rules shall apply to this contract.

Underlying: The Underlying for this Contract is the total number of transactions successfully included in finalized blocks on the Solana blockchain for <date>, including both user transactions and vote transactions unless otherwise specified. Revisions to the Underlying made after Expiration will not be accounted for in determining the Expiration Value.

Source Agency: The Source Agency is Dune Analytics.

Type: The type of Contract is an Event Contract.

Issuance: After the initial Contract, Contract iterations will be listed on an as-needed basis at the discretion of the Exchange and corresponding to the risk management needs of Members.

<count>: <count> refers to a specific number of transactions specified by the Exchange (e.g., 100,000,000, 200,000,000, 500,000,000). The Exchange may list iterations with counts ranging from 1,000,000 to 10,000,000,000 based on network activity levels.

<above/below>: <above/below> refers to whether the transaction count must exceed (above) or remain under (below) the specified <count>. "Above" means greater than (>), "below" means less than (<).

<date>: <date> refers to a calendar date specified by the Exchange. The Exchange may list iterations of the Contract corresponding to variations of <date>.

<tx_type>: <tx_type> refers to the category of transactions counted, specified by the Exchange as either "all transactions" (including votes), "user transactions only" (excluding votes), or "vote transactions only".

Payout Criterion: The Payout Criterion for the Contract encompasses the Expiration Values where Solana's total <tx_type> transaction count is <above/below> <count> on <date>.

Examples that would resolve to "Yes" for "above 150,000,000 user transactions":

- Solana processes 155,000,000 user transactions (plus any number of votes)
- Explorer shows 200,000,000 user transactions for the date
- 160,000,000 user transactions even if network was down for 2 hours

Examples that would NOT resolve to "Yes" for "above 150,000,000 user transactions":

- 149,999,999 user transactions
- 200,000,000 total transactions but only 100,000,000 are user transactions
- 150,000,000 exactly (must be above, not equal)
- Network halted entire day, no transactions processed

Minimum Tick: The Minimum Tick size for the Contract shall be $0.01.

Position Accountability Level: The Position Accountability Level for the Contract shall be $25,000 per strike, per Member.

Last Trading Date: The Last Trading Date of the Contract will be <date>. The Last Trading Time will be 11:59 PM ET.

Settlement Date: The Settlement Date of the Contract shall be no later than the day after the Expiration Date, unless the Market Outcome is under review pursuant to Rule 7.1.

Expiration Date: The latest Expiration Date of the Contract shall be one week after <date>. If an event described in the Payout Criterion occurs, expiration will be moved to an earlier date and time in accordance with Rule 7.2.

Expiration time: The Expiration time of the Contract shall be 10:00 AM ET.

Settlement Value: The Settlement Value for this Contract is $1.00.

Expiration Value: The Expiration Value is the value of the Underlying as documented by the Source Agency on the Expiration Date at the Expiration time.

Contingencies: Before Settlement, Kalshi may, at its sole discretion, initiate the Market Outcome Review Process pursuant to Rule 7.1 of the Rulebook. If an Expiration Value cannot be determined on the Expiration Date, Kalshi has the right to determine payouts pursuant to Rule 7.1 in the Rulebook.
