Re: KalshiEX LLC – CFTC Regulation 40.2(a) Notification Regarding the Initial Listing of the “Will <product> have <function> before <date>?” Contract

Dear Sir or Madam,

Pursuant to Section 5c(c) of the Commodity Exchange Act and Section 40.2(a) of the regulations of the Commodity Futures Trading Commission, KalshiEX LLC (Kalshi), a registered DCM, hereby notifies the Commission that it is self-certifying the “Will <product> have <function> before <date>?” contract (Contract). The Contract will initially be listed after close-of-business on **August 22, 2025**; it is listed as the day after because of limitations of the Commission's online submission portal. The Exchange intends to list the contract on a **custom ▾** basis. The Contract’s terms and conditions (Appendix A) includes the following strike conditions:

- **<date>**
- **<product>**
- **<function>**
- **<company>**
- **<service/company>**

Along with this letter, Kalshi submits the following documents:

- A concise explanation and analysis of the Contract;
- Certification;
- Appendix A with the Contract’s Terms and Conditions;
- Confidential Appendices with further information; and
- A request for FOIA confidential treatment.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Xavier Sottile
Head of Markets
KalshiEX LLC

KalshiEX LLC

Official Product Name: “Will <product> have <function> before <date>?”

Rulebook: PRODUCTFUNCTION

Summary: Product gaining specific function before specified date

Kalshi Contract Category: Science/Technology

Kalshi Internal Category: Science and Technology

August 22, 2025

CONCISE EXPLANATION AND ANALYSIS OF THE PRODUCT AND ITS COMPLIANCE WITH APPLICABLE PROVISIONS OF THE ACT, INCLUDING CORE PRINCIPLES AND THE COMMISSION'S REGULATIONS THEREUNDER

Pursuant to Commission Rule 40.2(a)(3)(v), the following is a concise explanation and analysis of the product and its compliance with the Act, including the relevant Core Principles (discussed in Appendix D), and the Commission's regulations thereunder.

I. Introduction

The “Will <product> have <function> before <date>?” Contract is a contract relating to Science and Technology.

Further information about the Contract, including an analysis of its risk mitigation and price basing utility, as well as additional considerations related to the Contract, is included in Confidential Appendices B, C, and D.

Pursuant to Section 5c(c) of the Act and CFTC Regulations 40.2(a), the Exchange hereby certifies that the listing of the Contract complies with the Act and Commission regulations under the Act.

General Contract Terms and Conditions: The Contract operates similar to other event contracts that the Exchange lists for trading. The minimum price fluctuation is \$0.01 (one cent). Price bands will apply so that Contracts may only be listed at values of at least \$0.01 and at most \$0.99. Further, the Contract is sized with a one-dollar notional value and has a minimum price fluctuation of \$0.01 to enable Members to match the size of the contracts purchased to their economic risks. As outlined in Rule 5.16 of the Rulebook, trading shall be available at all times outside of any maintenance windows, which will be announced in advance by the Exchange. Members will be charged fees in accordance with Rule 3.13 of the Rulebook. Fees, if they are charged, are charged in such amounts as may be revised from time to time to be reflected on the Exchange’s Website. A new Source Agency can be added via a Part 40 amendment. All instructions on how to access the Underlying are non-binding and are provided for convenience only and are not part of

the binding Terms and Conditions of the Contract. They may be clarified at any time. Furthermore, the Contract's payout structure is characterized by the payment of an absolute amount to the holder of one side of the option and no payment to the counterparty. During the time that trading on the Contract is open, Members are able to adjust their positions and trade freely. The Expiration Value and Market Outcome are determined at or after Market Close. The market is then settled by the Exchange, and the long position holders and short position holders are paid according to the Market Outcome. In this case, "long position holders" refers to Members who purchased the "Yes" side of the Contract and "short position holders" refers to Members who purchased the "No" side of the Contract. If the Market Outcome is "Yes," meaning that an event occurs that is encompassed within the Payout Criterion, then the long position holders are paid an absolute amount proportional to the size of their position and the short position holders receive no payment. If the Market Outcome is "No," then the short position holders are paid an absolute amount proportional to the size of their position and the long position holders receive no payment. Specification of the circumstances that would trigger a Market Outcome of "Yes" are included below in the section titled "Payout Criterion" in Appendix A.

**CERTIFICATIONS PURSUANT TO SECTION 5c OF THE COMMODITY EXCHANGE
ACT, 7 U.S.C. § 7A-2 AND COMMODITY FUTURES TRADING COMMISSION RULE
40.2, 17 C.F.R. § 40.2**

Based on the above analysis, the Exchange certifies that:

- ☐ The Contract complies with the Act and Commission regulations thereunder.
- ☐ This submission (other than those appendices for which confidential treatment has been requested) has been concurrently posted on the Exchange's website at <https://kalshi.com/regulatory/filings>.

Should you have any questions concerning the above, please contact the exchange at ProductFilings@kalshi.com.

Appendix A - Contract Terms and Conditions

Appendix B (Confidential) - Further Considerations

Appendix C (Confidential) - Source Agency

Appendix D (Confidential) - Compliance with Core Principles

APPENDIX A – CONTRACT TERMS AND CONDITIONS

Official Product Name: “Will <product> have <function> before <date>?”

Rulebook: PRODUCTFUNCTION

PRODUCTFUNCTION

Scope: These rules shall apply to this contract.

Underlying: The Underlying for this Contract is whether <product> implements <function> after Issuance and before <date>. Revisions to the Underlying made after Expiration will not be accounted for in determining the Expiration Value.

Source Agency: The Source Agencies are, in hierarchical order, <company> (including official blog, press releases, and social media accounts), TechCrunch, The Verge, Ars Technica, Wired, Reuters, Bloomberg Technology, The Information, The Wall Street Journal Technology section, VentureBeat, Engadget, The New York Times Technology section, Associated Press Technology coverage, Axios Technology newsletter, and Politico Technology coverage.

Type: The type of Contract is an Event Contract.

Issuance: After the initial Contract, Contract iterations will be listed on an as-needed basis at the discretion of the Exchange and corresponding to the risk management needs of Members.

<product>: <product> refers to the specific software application, web service, or digital platform specified by the Exchange. Unless otherwise specified, this include all official versions, interfaces, and access methods provided directly by <company> to end users, including free tiers, paid subscriptions, API access, mobile applications, and web interfaces. Regional variations and localized versions are included unless specifically excluded by the Exchange. <product> may also be described by characteristics (e.g. “any LLM model”).

<company>: <company> refers to the corporate entity that owns, operates, and maintains <product>, including any subsidiary or affiliated entity that has operational control over <product>'s features and functionality.

<function>: <function> refers to the specific product feature, system, mechanism, or operational ability specified by the Exchange. This encompasses any user-facing or backend functionality that alters how <product> operates, how users interact with the service, access content, or are charged for usage.

<date>: <date> refers to a calendar date specified by the Exchange. The Exchange may list iterations of the Contract corresponding to variations of <date>.

Payout Criterion: The Payout Criterion for the Contract encompasses the Expiration Values that <product> has implemented <function> after Issuance and before <date>. Implementation of <function> is defined as any system, feature, or mechanism that introduces the specified operational ability to <product> and meets all of the following conditions:

1. The <function> is live and processing user interactions, requests, or transactions
2. The <function> is not explicitly labeled as "beta," "test," "experimental," "preview," or "early access" or similar
3. The <function> has been officially acknowledged by <service/company> through announcement, documentation, or help pages
4. The <function> is implemented through <company>'s official systems and infrastructure

Unless otherwise specified in <function>, the implementation must occur in the United States.

The following constitute implementations that trigger the Payout Criterion:

- Direct integration of <function> into <product>'s user interface or backend systems
- Automatic application of <function> to user accounts, sessions, or transactions
- User-initiated activation of <function> through official <product> controls or settings
- API or programmatic implementation of <function> for developers or enterprise users
- Policy changes that operationally enforce <function> on user behavior or access
- Billing, payment, or account management systems that process <function>
- Third-party integration partnerships that enable <function> within <product>

The following do NOT constitute implementations:

- Announcement, preview, or demonstration of <function> without operational deployment
- Code repositories, documentation, or technical specifications that reference <function>
- Beta or alpha testing limited to <company> employees only
- Academic research, patents, or white papers describing <function>
- User interface elements prepared for <function> but not actively processing related transactions
- Third-party services that add <function> without <company> authorization or integration
- Regulatory requirements or legal mandates that do not result in actual technical implementation
- Marketing materials or promotional content describing planned <function>

Minimum Tick: The Minimum Tick size for the Contract shall be \$0.01.

Position Accountability Level: The Position Accountability Level for the Contract shall be \$25,000 per strike, per Member.

Last Trading Date: The Last Trading Date of the Contract will be the day prior to <date>. The Last Trading Time will be 11:59 PM ET.

Settlement Date: The Settlement Date of the Contract shall be no later than the day after the Expiration Date, unless the Market Outcome is under review pursuant to Rule 7.1.

Expiration Date: The latest Expiration Date of the Contract shall be one week after <date>. If an event described in the Payout Criterion occurs, expiration will be moved to an earlier date and time in accordance with Rule 7.2.

Expiration Time: The Expiration time of the Contract shall be 10:00 AM ET.

Settlement Value: The Settlement Value for this Contract is \$1.00.

Expiration Value: The Expiration Value is the value of the Underlying as documented by the Source Agency on the Expiration Date at the Expiration time.

Contingencies: Before Settlement, Kalshi may, at its sole discretion, initiate the Market Outcome Review Process pursuant to Rule 7.1 of the Rulebook. If an Expiration Value cannot be determined on the Expiration Date, Kalshi has the right to determine payouts pursuant to Rule 7.1 in the Rulebook.
